# IS HIV STILL A PROBLEM FOR GAY AND BI MEN?

## **INTERACTIVE** and **INFORMATIVE**

Gay and bi men are still the largest group of people who are contracting HIV. Why is that? What do we need to know to prevent HIV? What do we already know? What is being done in Canada to fight HIV? How are gay and bi men fighting HIV and preventing new HIV infections?

Join us in an informal, relaxed environment to share your views and stories with friends, peers and community. Chat with our speakers. Be part of a moderated conversation.

Refreshments will be provided.  
Space is limited. Reserve your spot now!

If you are unable to attend in person, please gather your colleagues and friends and join us live for the webinar, or after the event join us for a live blog and keep the discussion going.
