

HIV & Hepatitis C Preceptorship Programs for AIDS Service Organizations

Co-sponsored by:

Casey House, Bristol-Myers Squibb, Agouron Pharmaceuticals, Boehringer Ingelheim, Abbott Laboratories, Solvay Pharmaceuticals and GlaxoSmithKline in partnership with Shire Biochem

This program is for you if:

- ▶ You volunteer or work in an AIDS service organization (ASO)
- ▶ You want more information on the evolution of state-of-the-art clinical care/knowledge, including:
 - Epidemiology in Canada/Ontario/Toronto
 - Pathogenesis and natural history of HIV
 - Antiretroviral treatment guidelines/issues
 - Making a decision regarding initiation of therapy
 - Initial antiretroviral regimens vs. NNRTI
 - First antiretroviral failure/causes/therapeutic choices
 - Multiple antiretroviral failure/causes/therapeutic choices
 - Practical therapeutic issues
 - The role of resistance testing
 - Structured treatment interruptions
 - New medications
 - Hepatitis C co-infection

Facilitator:

Dr. David Fletcher is an HIV specialist who has been caring for persons living with HIV for over 15 years. He is currently in private practice in Toronto and has a patient base of approximately 700.
