

## ***How can we increase access to PrEP?***

- **Stigma:**
  - Safer space for queer and trans folks
  - Anonymous testing available
- **Prescriber:**
  - Interprofessional team of NP, RN, RPN, RPh, RPhT
  - Non-insured patients welcome
- **Cost:**
  - Pharmacists financial assistance
- **Time:**
  - Complete remote services availability
  - In-person services availability across Ontario

## The FASTEST Way to Start PrEP!

Medication on your first visit with Rapid Start:

### Step 1: PrEP Assessment

Meet with a Nurse Practitioner in person for a PrEP Assessment. You can also discuss Doxy-PEP.

### Step 2: Labwork & Vaccines

Full labwork will be done during the same visit. **If you want to start PrEP right away we will include a rapid HIV test.** (After starting care with us you will be offered sexual health vaccines too!)

### Step 3: Chat with Pharmacist

We will talk about your medication, answer your questions, and help you save with PrEPSaver. **Everyone** gets the first 3 months at no cost.

### Step 4: Ship It or Pick It Up

If you did not do a Rapid Start, once all your lab results come in your medication can be shipped to your door or you can come pick it up.

### Pharmacist:

1. Gathers list of potentially missed drugs/supplements
2. Counsels on missed doses, side effects, drug interactions, follow-up
3. Provide financial assistance (insurance forms, public coverage, copay cards, etc.)
4. Dispense prescriptions and proactively offer bridging/vaccines
