

PREFERENCES AND NEEDS FOR AGING CARE
AMONG HIV-POSITIVE ELDERLY PEOPLE IN CANADA

PANACHE

A COMMUNITY-BASED
RESEARCH STUDY

Take part in the first ever Canadian survey on HIV and aging.

- Are you aging (60+ years) with HIV in Canada?
- Are you interested in talking about your health and social care needs as you age?
- Do you speak English or French?

You may be eligible to complete an online survey independently or with the support of a Community Researcher. The survey should take about 90 minutes and you will receive compensation for your time.

To learn more or to participate in this study:

Scan the QR code, visit **PANACHE National Survey** or contact the Research Coordinator at panache@realizecanada.org or 437-505-4333.

*The security of information sent by email cannot be guaranteed. Please do not send sensitive personal information by email. This study, conducted by Dr. Sharon Walmsley (University of Toronto) and Kate Murzin (Realize), has been approved by the University of Toronto Research Ethics Board (Protocol # 47060). This project is funded by Canadian Institutes of Health Research.
