Ontario Integrated Supervised Injection
Services Feasibility Study

We interviewed 200 people who injected drugs in the last 6 months in Thunder Bay, Ontario to find out about their willingness to use supervised injection services (SIS).

69% of all people who inject drugs are willing to use SIS.

Most common reasons for wanting to use SIS

- access to sterile injecting equipment
- preventing overdoses

Most common reasons for not wanting to use SIS

- already having a place to inject
- not wanting to be seen

Thunder Bay South core (Fort William) and **Thunder Bay North core** (Port Arthur) were the top first and second choice for where to implement SIS in Thunder Bay.
